

Highly motivated fresher seeking an entry-level Python or Backend Developer position in a growth-oriented organization. Passionate about working on real-world backend development projects, learning industry best practices, and contributing to the development of secure, scalable, and high-performance applications. Looking for an opportunity to grow professionally while delivering reliable and maintainable backend solutions.

TECHNICAL SKILLS

Systems - Windows (7/10/11), Networking, Hardware diagnostics, firewall configuration, incident response, vulnerability assessment, **Security:** endpoint security
Backend: Python, FastAPI, Django, Django REST Framework, REST APIs, HTTP methods, JSON, CRUD, ORM, API testing, API integration, JWT, token-based authentication, CORS, CSRF, OWASP, deployment basics
IT Tools: Microsoft 365, remote support tools, troubleshooting support tools, ticketing systems, Git/GitHub, Postman, Swagger, OpenAPI, AI developer tools

EXPERIENCE

Cybersecurity Intern – Elevate Lab [01 MAY 2025 — 28 June 2025]
ELEVATE LABS MUMBAI

- Conducted network scanning, vulnerability assessment, and management of firewalls on systems running Windows.
- Captured and analyzed network traffic via Wireshark; enforced stronger passwords to improve the security of the system.
- Identified and removed suspicious browser extensions, enhancing my overall Cybersecurity awareness and protection.

Python Intern [01 June 2025 — 16 July 2025]
WIPRO–Skill Forge Bengaluru, Karnataka

- Completed Python Fundamentals internship course, gaining hands-on experience in scripting and automation
- Practiced core concepts including data types, control flow, and file handling for real-world tasks.
- Applied Python to small projects, improving problem-solving and debugging skills. .

Virtual Job Simulations – Forge [2024 — 2026]
Completed cybersecurity simulations with Forage, Tata, Mastercard, ANZ and Datacom. Gained practical exposure to network security, incident response and vulnerability assessment.

AI -Powered Python Workshop [January— FEBRUARY 2026]
Gained hands-on experience in Python basics, data structures, and logic building.
small programs to strengthen logic and problem-solving skills

API Fundamental Student Expert Program - Postman [November – December 2025]
Developed foundational knowledge of REST APIs, HTTP methods, endpoints, request/response handling, and JSON.
Gained hands-on experience with API testing and debugging using Postman, including headers, parameters, and API requests.
Built practical understanding of API integration concepts relevant to Python backend and web application development.

Advanced Python 3.5 Training - EDUCBA [April – May 2026]
Completed advanced training in Python programming, covering Object-Oriented Programming (OOP), data structures, exception handling, file handling, modules and packages, and functional programming concepts.

REST API[Intermediate] Skills Certification – HackerRank [May 2026]
Developed Python solutions for REST API challenges, demonstrating practical skills in HTTP requests, JSON handling, API integration, and backend problem-solving.

PROJECTS

Personal Firewall – Network Traffic Monitoring System [Python] [June 2025—July 2025]
Developed a Python-based Personal Firewall to monitor and control incoming and outgoing network traffic, implementing real-time packet inspection using Scapy to analyze TCP/IP packets. Designed rule-based filtering to allow or block traffic based on IP address, port, and protocol, and tested the system by simulating suspicious traffic to validate firewall rules. This project strengthened practical knowledge of Python, packet analysis, network protocols, and firewall configuration.

EDUCATION

Bachelor of Science, [Indira Gandhi National Open University] [2024 – Present]
Senior Secondary [10+2] – [SCIENCE] - National Institute of Open Schooling [2021 — 2022]
Secondary [10] Central Board of Secondary Education [2017 — 2018]
Diploma in Computer Application LORD BUDDHA COMPUTER ACADEMY [2025]
